“The Power of Independent Thought In A Divisive World: The act of thinking for oneself is a profoundly powerful yet underutilized faculty of the human mind” [...](#) by Demi Pietchell’s [...](#) [facebook] The Starfire Codes [...](#) [substack]

“Afuera!” Everyone’s new favorite word! A short lesson in political science by Javier Milei, Argentina. — <https://rwmalonemd.substack.com/p/sunday-strip-death-taxes-and-gun> [scroll down a little to find a short Milei video and a Milei meme]

Bettina Brentano [...](#) by Jan Swafford [...](#)

“She was Beethoven's inspiration, Goethe's companion and caught the eye of Napoleon. But many still regard Bettina Brentano as a fraud, says Jan Swafford”

“Who,” asked Napoleon Bonaparte, “is that fuzzy young person?” She was Elisabeth Brentano, known simply as Bettina. Actually, Napoleon was not among her conquests, nor was he her type. She did not jump into his lap, as she did with Goethe, or croon her name into his ear, as with Beethoven, or go for intimate walks, as with Karl Marx. Napoleon did not dedicate a battle to her, as Beethoven, Schumann and Brahms dedicated songs and the Grimms an edition of their fairy tales. But, even at a distance, Bettina Brentano drew comment.” —Jan Swafford

Did she write this for Beethoven?

"Music is a higher revelation than all wisdom and philosophy, the wine which inspires one to new generative processes, and I am the Bacchus who presses out this glorious wine for mankind and makes them spiritually drunken. When they have again become sober they have drawn from the sea all that they can bring to dry land ... music is the incorporeal entrance into the higher world of knowledge which comprehends mankind but which mankind cannot comprehend."

*Johannes Brahms: A Biography* [...](#) [goodreads, contains links to kindle] by Jan Swafford

BqETH [...](#) “a weapon of mass disclosure” -J.D. Berton, creator of BqETH

What could happen if, before their death or disappearance, anyone could have set a simple tool to release a secret to which access or key had been given to no one?” A new kind of “deadman” switch.

Also a new way to safeguard the passage of digital wealth from one generation to the next.

Bourke Engines

The Bourke Engine [...](#) [david s. wolfe] “The Bourke Engine runs on an incredibly lean air/fuel ratio! It produces more horsepower and torque per pound of fuel than any other piston engine in history! It has only 2 moving parts! The oil never has to be replaced! It runs very quiet! It runs much cooler than conventional engines and produces much more power due to its extremely high thermal efficiency! Perhaps the most efficient piston engine ever invented!”

Vitaliy Katsenelson writes [...](#) of Bach’s Concerto No. 1 in D Minor

“I have to admit that a love for Bach’s music is fairly new to me. I felt Baroque music lacked emotion and was somewhat boring. Then one day I was perusing YouTube and stumbled on a video of Glenn Gould playing Bach’s Concerto No. 1 in D Minor. I don’t know if it was Gould or Bach, but I was mesmerized by this piece and listened to it nonstop for a week. This was Glenn Gould’s first public performance. He is introduced to the world by the one and only Leonard Bernstein, who is also conducting the concerto.”

Gonzalo Schwartz, President and CEO of Archbridge Institute [...](#) writes: "... I'm excited to share a new website devoted to showcasing our annual [American Dream Survey project](#), which we released earlier this year. What's exciting—and why I told you my story—is that the website includes interactive maps featuring responses to two new questions: What is your American Dream? And who is helping you achieve it? I hope you enjoy reading the answers as much as I did.

"I'm also excited to share the release of the book, *The Heart of a Cheetah*, by my great friend Magatte Wade, who is living her own American Dream trying to lift barriers to human flourishing in her native Africa and bringing prosperity to the region. I will have a review soon, but in the meantime, I encourage everyone to [get a copy](#)."

David Hock provides this excerpt from the website of [midwesterndoctor.com](http://midwesterndoctor.com)

"... as detailed in [The War on Ivermectin](#), there were 80 lawsuits where families with a relative being subjected to Fauci's hospital COVID protocols and was expected to die had lawyer Ralph Lorigo sue the hospital for ivermectin to be administered to their relative. Of those 80 lawsuits, in 40 the judge sided with the family, and in 40 with the hospital. Of the 40 cases where ivermectin was given, 38 of the 40 patients survived. Of the 40 cases where the hospitals were allowed to withhold ivermectin, 2 of the 40 patients survived. This should have been a sign to consider using ivermectin but instead the hospitals banded together to develop a robust legal strategy to prevent any future lawsuits from succeeding. This in my eyes clearly illustrates the degree to which hospitals prioritize profits over patients." — [midwesterndoctor.com/p/the-many-dangers-of-spinal-surgery](http://midwesterndoctor.com/p/the-many-dangers-of-spinal-surgery)

"Gaza vs. Ukraine: A Tale of Two Wars" [...](#) by Vasco Kohlmayer, 15 Nov 23, at his Substack: Notes from the Twilight Zone [...](#)

Dr. Pierre Kory interviewed [...](#) by Jason James on Brave New Normal (BNN) [...](#)

<https://rumble.com/v3uh0pp-the-war-on-ivermectin-w-dr.-pierre-kory.html>

Dr. Kory is being described by the usual information sources as a quack, an extremist, etc. This should give you some inkling that he may be saying true things that need to be heard. Please listen to some of this interview and decide what you think. -ls

Regenerating a Forest [\[mercola\]](#) with video

‘Under the theory of “minimal interference,” Wilson and others embraced the presence of an exotic native “weed” called gorse to turn pastureland into a thriving forest. Gorse, which is hated and considered a nuisance by pastoral farmers, helped regenerate forests by providing a canopy for native forest plants to grow and thrive’

“MycoRestoration of Abandoned Logging Roads” [\[mercola\]](#) Paul Stamets, 25 Jun 2023

McCullough Foundation Mission Statement (first two paragraphs)

McCullough Foundation is dedicated to the proposition that a government of the people, by the people, for the people, can only exist if the people are educated about health, disease, and public health policies. As James Madison, author of the U.S. Constitution remarked: “Knowledge will forever govern ignorance, and a people who mean to be their own governors must arm themselves with the power knowledge gives.”

As we learned during the COVID-19 pandemic, our deep-seated fear of deadly infectious disease makes us very susceptible to manipulation by public health officials (often in league with undeclared commercial interests) who invoke emergency power with the purported objective of protecting us. Thus, our fear of infectious disease can be exploited by unscrupulous public officials in the same way our fear of foreign invaders has been used by dictators and tyrants throughout history. Again, to quote James Madison: “The means of defense against foreign danger have been always the instruments of tyranny at home.”
